

Final Conference – Flemish Living Lab Electric Vehicles

- 3 years of real-life electric mobility experience -

DIAMANT Brussels Conference & Business Centre, A. Reyerslaan 80, 1030 Brussels

December 1st 2014, from 13h30 until 19h00

The partners of the Flemish Living Lab Electric Vehicles warmly invite you on their final conference. This will be the starting point of an electrifying week in Brussels since it will take place just before the European Electric Vehicle Congress (www.eevc.eu) and the already famous EU Project Day.

After 3 years of intensive real-life testing, the Flemish Living Lab Electric Vehicles we will present its innovative highlights related to electric vehicles, charging infrastructure, energy services and mobility concepts. We will also have a panel debate together with international experts on the next steps in electric mobility from the economic and innovation point of view.

The Flemish Living Lab is an open innovation platform which is co-funded by the Flemish government (16,25 m€). More than 70 partners in the Flemish Living Lab Electric Vehicles have been working intensively on innovative products and services related to the questions mentioned above. These innovations have been tested real-life for more than 3 years by a broad test population.

Programme

- Flemish Living Lab Electric Vehicles results will be presented by speakers of : Umicore, Punch Powertrain, BlueCorner, VUB, Siemens, REstore, NMBS
- Panel debate on electric mobility from the economic and innovation point of view : the 5 platform coordinators (Eandis, Umicore, NMBS, Punch Powertrain and Siemens) and international experts from e-mobil BW (Germany), Green eMotion and Netherlands Enterprise Agency (the Netherlands)
- A networking reception will conclude the final conference

Registration

- The conference is free of charge
- You can register via www.livinglab-ev.be

Electric mobility can contribute substantially to solve some of our societal, ecologic and economic challenges. We are looking forward to meet you at our final conference to discuss the future of electric mobility !
